

**In the Claims:**

Kindly amend the claims as follows:

1. (CANCELED)
2. (NEW) A method for extinguishing a fire, comprising:  
directing exhaust from a jet engine through a series of pipes;  
channeling the exhaust from the series of pipes through a radiator cooling system;  
submerging the series of pipes in a cooling tank filled with cold water;  
filtering the exhaust for water, soot, oil, and other by products of jet engine  
exhaust;  
then dispensing the exhaust onto the fire.
